

Welcome to FUDCon!

Fedora is built on four foundations — Freedom, Friends, Features, and First. These are fundamental to everything we do, and FUDCon, as a premiere Fedora event, celebrates all of them. We share free and open source software and knowledge, we present and learn about features in that software, and we work on exciting new things. Most of all though, FUDCon brings together Fedora users and developers in person, reuniting familiar faces and building new friendships.

So, welcome to FUDCon APAC 2015 ! Share, learn, and have fun !
